## **SureFire's Outdoorsman Series Flashlights Get More Lumens and a Second Output Level**

**Fountain Valley, CA** -- SureFire<sup>®</sup>, designer and manufacturer of high-performance illumination tools, has upgraded its Outdoorsman Series with dual-stage switching and higher lumen outputs. The new, super-efficient LEDs used in Outdoorsman flashlights will generate higher maximum outputs, and the microprocessor has been pre-programmed to accommodate a second, low output stage. These upgrades were done using the same power source and tailcap switch, with no additional cost to the customer.

The new, electronically regulated LED still utilizes a Total Internal Reflection (TIR) lens to help maximize light transmission and create a user-friendly beam with a bright center and gradually diminishing corona. The one-battery E1L now has a maximum output of 45 lumens (a 15 lumen increase) with a two lumen low output setting, and a total runtime of 8.5 hours. The two-battery E2L now has a max output of 60 lumens (up by 15), with a three lumen low output setting, and 11 hours of total useful light.

Both lights are still made from aerospace-grade aluminum and hard anodized for a strong, durable finish. O-ring seals help keep out moisture, dust, and dirt, and a strong Pyrex window protects the solid-state LED from impact. The Outdoorsman series flashlights feature stainless-steel pocket clips, convenient click-on/off two-stage switching, and patented lockout tailcaps to prevent accidental activation during transport or storage.

The dual output levels are easily controlled with the same clicky tailcap as the previous generation Outdoorsmen series. The primary output level is the low setting. To change

## Upgraded Outdoorsman-2

output levels, simply click once, click off and click back on within two seconds. This can also be done by depressing the tailcap halfway, letting go, and depressing halfway again within two seconds.

The diminutive E1L measures only 3.3 inches long and weighs a mere 2.2 ounces with batteries. The slightly larger E2L is 5.25 inches long and weighs 3.5 ounces. MSRP for the E1L is \$129; \$149 for the E2L. Both lights are available through authorized SureFire dealers or direct from SureFire by calling 800-828-8809 or visiting [www.surefire.com](http://www.surefire.com) online.

### **About SureFire**

Located in Fountain Valley, California, SureFire manufactures high-performance flashlights, weapon-mounted lights, and other tactical equipment for those who go in harm's way or anyone who demands the best. SureFire illumination tools are used by more SWAT teams and elite special operations groups than any other brand. For information, call **800-828-8809** or visit **[www.surefire.com](http://www.surefire.com)**.
