SureFire G3 LED Designed to Run Longer Than Rechargeable Flashlights

Fountain Valley, CA -- SureFire, LLC, manufacturer of high-end illumination tools and tactical products, has announced the latest addition to its product line—the G3™ LED. The new polymer-bodied LED flashlight is similar to SureFire's popular G3™ Nitrolon® with two significant differences: it features a long-running light emitting diode instead of a high-output incandescent lamp and it has an aluminum head for better heat dissipation which improves runtime.

With a length of only 6.5 inches and a weight of 5.5 ounces, the G3 LED is portable enough to actually carry every day. Its tough polymer body is non-conductive, corrosion proof, and features a molded-in grid pattern for a secure grip in wet conditions or while wearing gloves. O-ring seals keep out moisture, dust, and dirt, and because the G3 LED's solid-state light emitting diode has no filament to burn out or break, it never needs to be replaced. This digitally regulated, super-efficient LED generates 80 lumens of blinding light and continues producing useful light levels for 9.4 hours on a set of SureFire 123A lithium batteries. What's more, it's programmed to deliver 5.8 hours of high output light, making it a natural fit for anyone in need of lots of light for a long time.

"The G3 LED was designed to deal with the inconvenience of having to constantly recharge or replace the batteries on high output flashlights," said Aaron Zapata, SureFire's product manager for the new flashlight. "Our customers wanted both high output and long runtime, and there isn't always time or place to recharge a flashlight. Plus, rechargeable flashlights start to lose power as soon as they're removed from their chargers, so a handheld that produces tactical-level lighting for nearly six hours and runs on disposable batteries promises to be an incredibly useful tool."

G3LED continued – 2

Like all SureFire illumination tools, the G3 LED is backed by SureFire's No-Hassle Guaranty. It has an MSRP of \$92 and is available for purchase from an authorized SureFire dealer or directly from SureFire by calling 800-828-8809 or visiting surefire.com.

About SureFire

Located in Fountain Valley, California, SureFire manufactures high-performance flashlights, weapon-mounted lights, and other tactical equipment for those who go in harm's way. SureFire illumination tools are used by more SWAT teams and elite special operations groups than any other brand.
